Docket No. 9660-4

**AMENDMENTS TO THE CLAIMS**

This listing will replace all prior versions, and listings, of claims in the application:

1. (Currently amended) A brazier grill for grilling meat or similar foodstuff in a brazier, having grooved grill bars which are essentially placed in parallel to each other and single layered and which allow molten fats and cooking liquids emanating from a foodstuff grilled thereon to drain out during grilling, ~~characterized in that,~~

wherein said grooved grill bars are placed in parallel to each other with a predetermined distance therebetween of ~~b2~~, so as to form a grill ~~grill~~ opening in ~~T~~ direction with having a width of 1 mm to 10 mm, in order to allow heat rays emitted from such heat source to contact ~~directly~~ to said foodstuff directly on such grooved grill bars without encountering any obstructions during grilling.

2. (Currently amended) ~~[[A]]~~ The brazier grill according to claim 1, ~~characterized in that wherein~~ the grill openings between said grooved grill bars have a width ~~that corresponds to~~ of 4 mm to 8 mm.

3. (Currently amended) ~~[[A]]~~ The brazier grill according to claim 1, ~~characterized in that wherein~~ said grooved grill bars have a ~~b1~~ width ~~that corresponds to~~ of 15 mm to 20 mm.

4. (Currently amended) ~~[[A]]~~ The brazier grill according to claim 1, ~~characterized in that wherein~~ said grooved grill bars have a wavelike ~~form~~ form and comprise three support points for foodstuffs.

5. (Currently amended) A brazier for grilling foodstuff, ~~characterized in that it comprises~~ comprising a brazier grill according to claim 1, ~~and that, thanks wherein, due to a~~

supporting structure constituting a free space between the brazier grill and heat source, it directly receives heat rays emitted by the heat source from underneath the brazier grill, namely from said grill openings at the lower surface of the said grooved grill bars.

6. (New) The brazier grill according to claim 1, wherein the grill bars are inclined such that fat collected in the grooves can move towards an end of the bars away from foodstuff placed on the grill bars.
